

18.3.24

Good morning,

What a fantastic week the children had last week - Science Week 2024 was a big success! I hope they all came home and talked about the captivating assembly we enjoyed with Dr Gower from Redruth school. How lucky we are to have such well established links with our local learning community. You can see more information in the newsletter and on the website.

This week we will continue our Mass, Capacity and Temperature unit in maths and our Fantastic Mr Fox narrative in writing.

The afternoons will have a geography focus where we will be embedding our knowledge of capital cities of the United Kingdom before moving on to look at continents and the equator. Building this knowledge of the world is so important - the children are fascinated by life outside of their local area and it is exciting to be able to take them there virtually.

In science we continue our materials unit following on from a successful introduction last week - we will look at the various properties of materials and why we might choose one material over another depending on the purpose.

PE this week will be Wednesday.

On Friday we have our Easter Fayre taking place after school - please see the newsletter and posters for more information on this

Thank you, have a great week.

S Autie
